

## Software R&D (M/F, 2 positions)

### Company presentation

neovini sàrl is an R&D Centre active in the ICT and e-commerce area, specialised in cloud-based software for complex transaction processing, and business intelligence solutions, to support the growing needs of modern organisations.

### The position

Together with your colleagues, you manage the projects assigned to you, being part of the day-to-day operational R&D activities. You will use leadership, take initiative and active responsibility. An innovative mind-set is required for the research and development of business solutions, whilst continuously striving to improve and optimise work processes and routines. Teamwork comes naturally within an open and constructive work environment.

We are looking for you, aspiring to work in a creative growth area, with a high pace and a stimulating international atmosphere.

Do you want to go for Frontend? Or do you want to work on Backend? Perhaps you master both? We look for people for both domains! Have a look at the end\*\*\* of this posting, listing the additional qualifications which will be meriting for the job.

You should have completed your studies, preferably at engineering/doctorate level, in computer and systems science, or equivalent.

You bring experience from working with/active handling of incident, problem and change management.

In possession and showing social skills, you are self-motivated and engaged. Taking responsibility is important for you. Based on sound judgement, you are able take your own decisions. You have a genuine interest in learning new things.

In this CDI position, you must have the sufficient knowledge to read, write and talk English – the corporate language – with your colleagues, being part of a multi-national group.

### Qualifications and experience

Successful candidates must have:

- a) Computer and systems science, ideally at engineer/doctorate level
- b) Good English knowledge (read, spoken, written), preferably having passed TOEFL. Additional languages are true assets
- c) Passion for development
- d) Good knowledge in web-application standards knowledge (html5/CSS3) and Javascript with mobile-first thinking
- e) Good knowledge in service oriented architectures
- f) Focus on user-friendliness and customer needs

## Process for application

Please send a motivational letter and your CV - in the English language - by email to **recruitment (at) neovini . fr** for the attention of

Mr Thomas BRANDT, Gérant.

Welcome with your application!

\*\*\*
